NSCAD ^{ART} FACTORY 2017

School of
Extended Studies

about

The NSCAD Art Factory was a pilot project developed by Leesa Hamilton, Education and Community Outreach Consultant and Catherine Allen, Program Coordinator NSCAD's School of Extended Studies, in partnership with Phoenix Youth Programs. The Art Factory program provided senior level NSCAD students with employment, training and support in workshop development and delivery. In 2017, we were able to offer a Winter and Summer Pilot Program, each program consisted of a series of weekly, hands on workshops for Phoenix Participants. The Art Factory was designed to further develop the participant's art making practices and

demonstrate the opportunities available at NSCAD University. The Art Factory opened NSCAD's professional art studios to a wider community of people, expanding the possibilities of art making. Art Factory I had participants working in the jewellery studio, 3D printing as well as in the ceramics department. The second pilot project focused on creating textiles through dyeing and printmaking processes and then working in the fashion studio to develop constructed products and wearable garments.

NSCAD ART FACTORY

thank you

NSCAD's Art Factory Pilot project was made possible with the dedicated partnership of Phoenix Youth Programs, specifically the SPIN program. Their passion for this project enabled us to open NSCAD's doors and extend art-making and teaching opportunities into the community. It was a true collaboration and we could not have developed these pilot projects without their tireless support.

Thank you to all of the NSCAD students involved who were willing to share their passion for art and art making. We have so much talent at NSCAD, it has been incredible to watch our students become the teachers.

To the talented group of Factory Artists, it was a privilege to be able to facilitate the development of your artistic talent. It is never easy to try new things but your dedication and determination paid off with wonderful projects and new skills. We wish you all the best in your art making futures!
